| Anesthesia OOOR Procedure Documentation	The OOOR Procedure record documentation process is to be followed when an Anesthesia provider is performing a procedure outside of the OR. Examples include: Intubation, PIV placement or Sedation in the ER or Med/Surg Units
Access the OOOR Procedure Navigator from Patient Lists	**Patient Lists** ⌗ Edit List ▾ Properties Add Patient 🗏 Open Chart ⊋ Evaluation Pre ⟋ OOOR Procedure Post Patient Report
The user will be prompted to create an Anesthesia record, or open a record that has already been created. It is important to note that there should only be one record for each procedure performed on a patient. Also important that the actual procedure should not be documented in the Pre Eval record.	**Record Select** Select a procedure to document on for Test, BrentWMC. ● 01/07/20: INTUBATION Create a new procedure ANESTHESIA PRE EVALUATION EPIDURAL BLOOD PATCH SEDATION LINE PLACEMENT ⌖ Other Accept Cancel

The OOOR Procedure Workspace will display a report with patient information such as medications given during the encounter, vital signs, events and notes written on the current encounter.

1/7/20: Pre-op evaluation documentation initiated by: CRNA User WMC

This is just a portion of the anesthesia preoperative evaluation.
For the full evaluation record, select the appropriate Anesthesia Encounter under the Encounters tab of Ch

🔲 Block Timeout Performed

1/7/2020
1231

Timeout Performed: Y

Block Notes

No procedure notes have been written.

The toolkit for the OOOR Procedure Workspace will include:

Pre: To be used to jump to the Pre Procedure navigator

Macro: To be used to apply the epidural Macro

Staff: To assign the appropriate responsible anesthesia provider to the encounter

Timeout: To document the timeout items prior to starting the epidural

Blocks: To document the block note

Lines: To document lines inserted

Airways: To document airways inserted

Meds: To document any meds given during the procedure

Post: To be used to jump to the Post Procedure navigator
